

I am a deaf resident of Myrtle Beach, SC being jumping from one Federal & State govts. with ADA complaints for 5 yrs. with the SC hospitals and doctors for denying me qualified interpreter. And nothing have been solved with DOJ, SC Protection and Advocacy (SCPA), SC U.S. Attorney, U.S. Humane Resources. Video Remote System (VRS) should be used as Video Remote Interpreting on Line. There is shortage of interpreters in SC and most doctors or hospitals refused to pay for the interpreter's fee. I dont understand why FCC against having a doctor in the same room as the deaf patient. I already used VRS with the SC Dept. of Mental health and it worked excellent.
